DISCLAIMER

The volume mentioned in this document for the different areas and compartments are for illustration purposes only and do not constitute any kind of guarantee or covenant that such volume can be used in full. Box size, shape and weight can significantly reduce the cargo volume possible to transport on this aircraft. Furthermore, to support the aircraft maintenance and operation, on most flights the carrier might need to carry one or two AKE containers and/or PMC pallet with spare parts, tow bar, tools and consumables. This will further reduce the space available for cargo. The price quoted for your flight does not depend on the actual volume carried.
